Control your layout with style and ease...

Z21

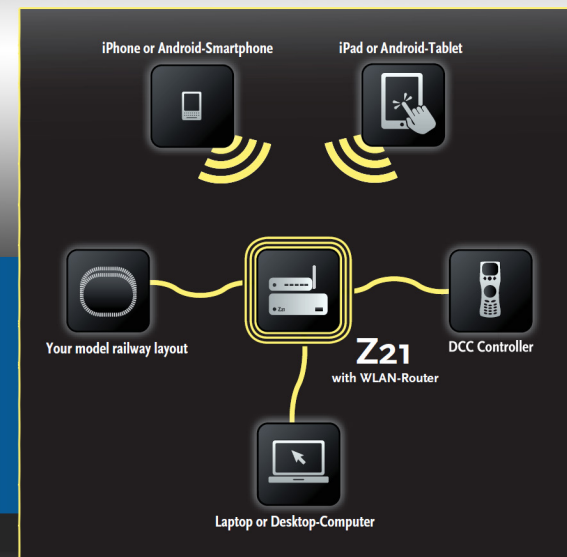

Z21 Digital System

The latest generation of multi-protocol command station is the ideal control system for locomotives with DCC or Motorola decoders and the perfect control for all digital components.

The centre connects the system and the digital locomotives via Wi-Fi using a smartphone or tablet PC and the control apps installed there, either one of our digital cabs or Z21 Mobile App.

Simply put, you can control your Model Railway using your mobile phone or tablet.

Z21

Easy, intuitive control on smart phones and tablets

- Control your layout using your own smartphone or tablet.
- Select your locos on sight rather than needing to remember address numbers.
- Create an aerial view of your layout and position the points and accessories where they are on the layout.
- Many interfaces: LAN, 3-times-X bus, feedback, and Booster LocoNet bus, main (confirmable), Programming and update track (confirmable).
- Full programming capability.
- Easy to use graphical interface.
- Management of your entire locomotive library in a single application.
- Control switches, signals and many other digital components.
- For iPads and Android tablets.
- Includes: Z21 digital center, wireless router, laptop or desktop computer-powerful switch-mode power supply.

Z21

Control your layout with style and ease...

With full control of digital locomotives and accessories on your smart phone or tablet computer, the Z21 really is the next generation of DCC control.
